

ArgoCD App of Apps

SK

Single source of truth GitHub repository leveraging the App-of-Apps pattern

The screenshot shows the GitHub repository page for 'argocd-app-of-apps' by user 'semever24'. The repository is public and has 11 commits. The main branch is 'master'. The repository contains the following files:

File	Commit Message	Time
apps	New files added	now
.gitignore	gitignore	4 hours ago
README.md	Initial commit	4 hours ago
app-of-apps.yaml	New files added	2 hours ago

The README file is visible, titled 'argocd-app-of-apps' and 'ArgoCD App Of Apps'. The right sidebar shows the repository's activity, including 0 stars, 0 watching, and 0 forks. The bottom of the screenshot shows the Windows taskbar with various application icons and the system clock at 15:38 on 23-12-2025.

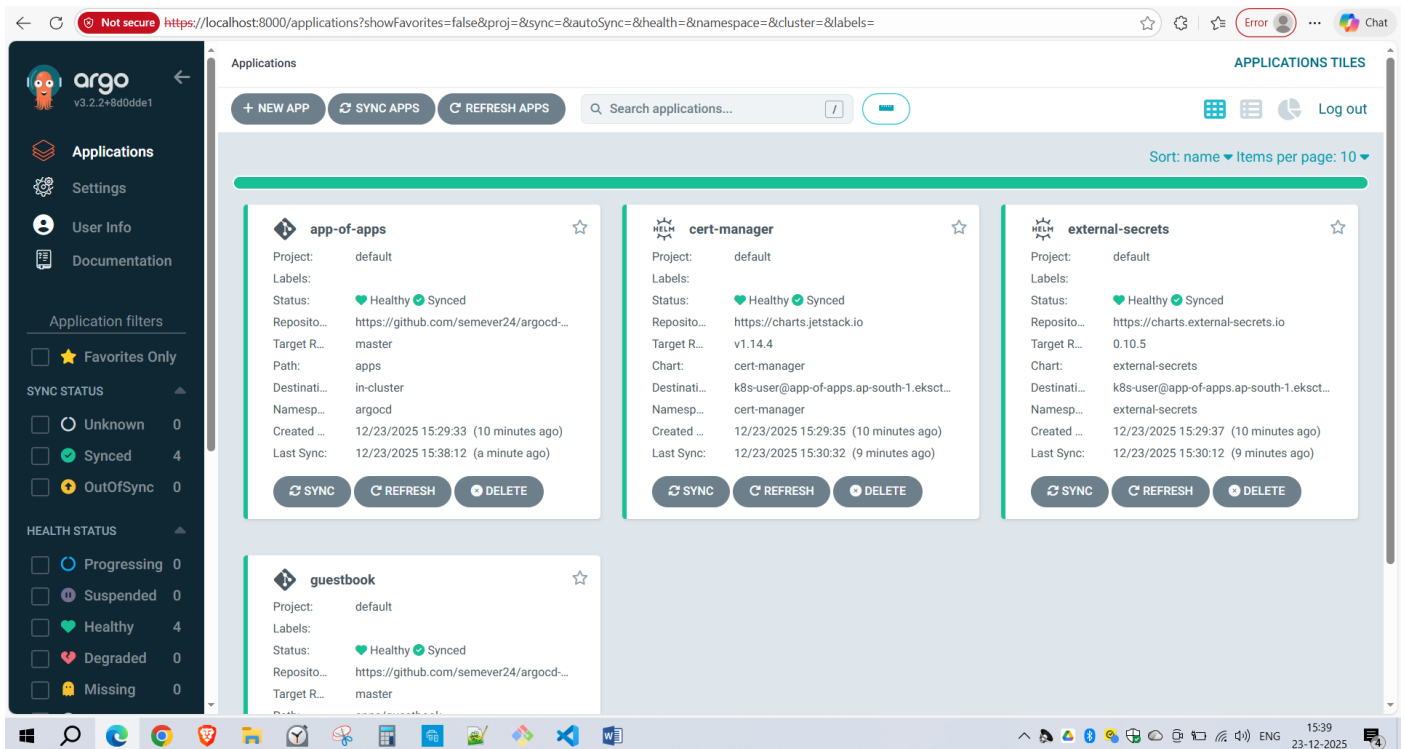

GitOps in action: deploying three applications to Kubernetes cluster with ArgoCD

The screenshot shows the 'apps' directory of the 'argocd-app-of-apps' repository. The directory contains the following files:

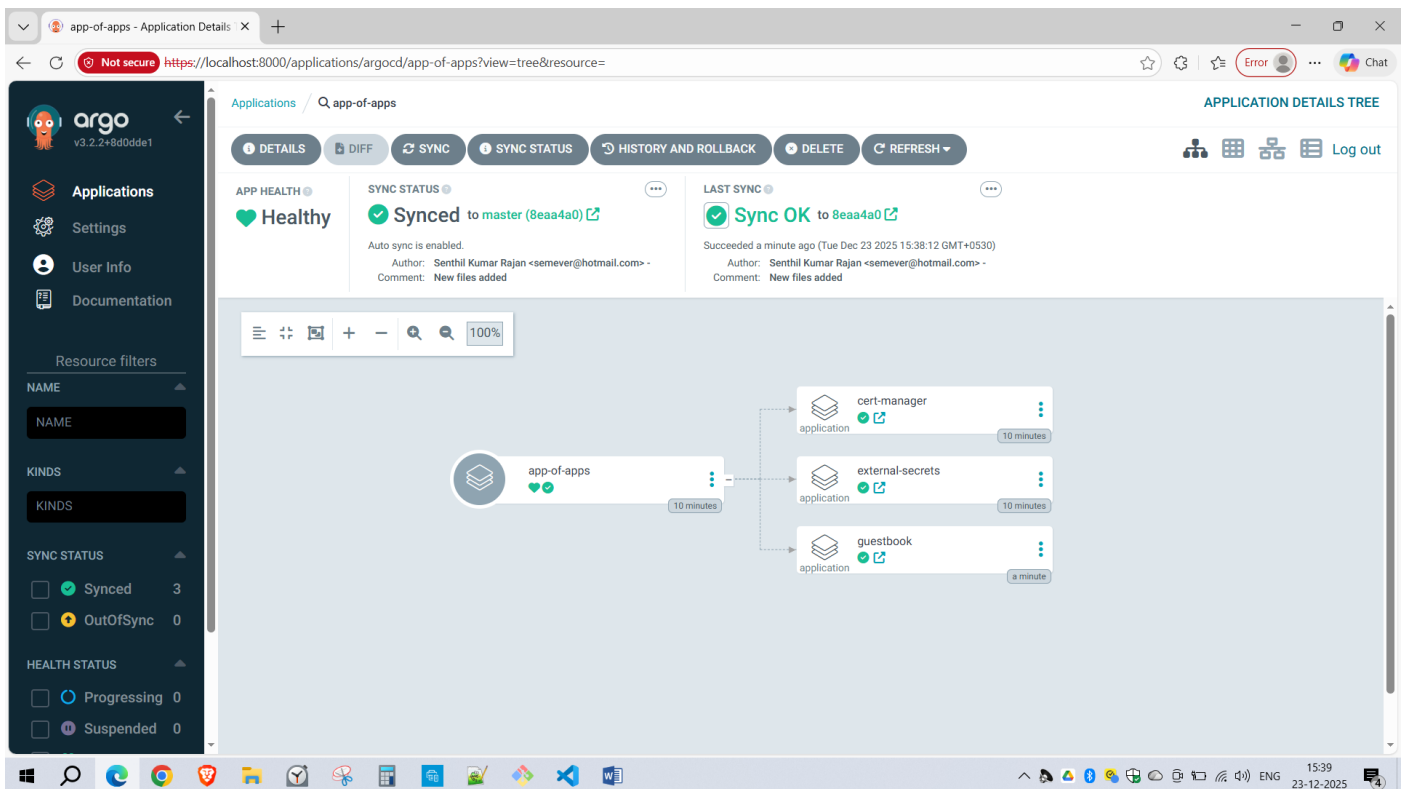

Name	Last commit message	Last commit date
..		
guestbook	New files added	1 minute ago
cert-manager.yaml	New files added	10 minutes ago
external-secrets.yaml	New files added	10 minutes ago
guestbook.yaml	New files added	10 minutes ago

The left sidebar shows the repository's file structure, including the 'apps' directory and its contents. The bottom of the screenshot shows the Windows taskbar with various application icons and the system clock at 15:39 on 23-12-2025.

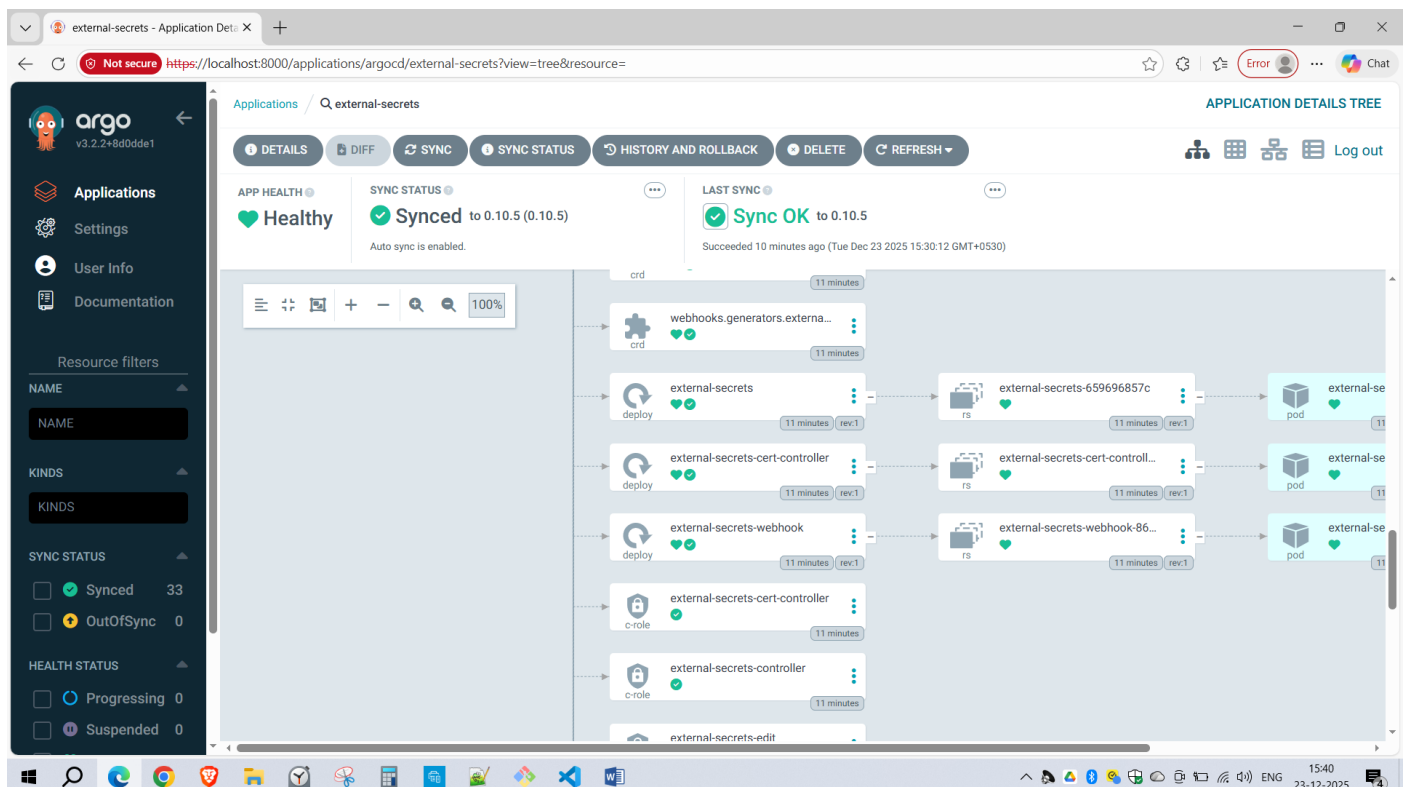

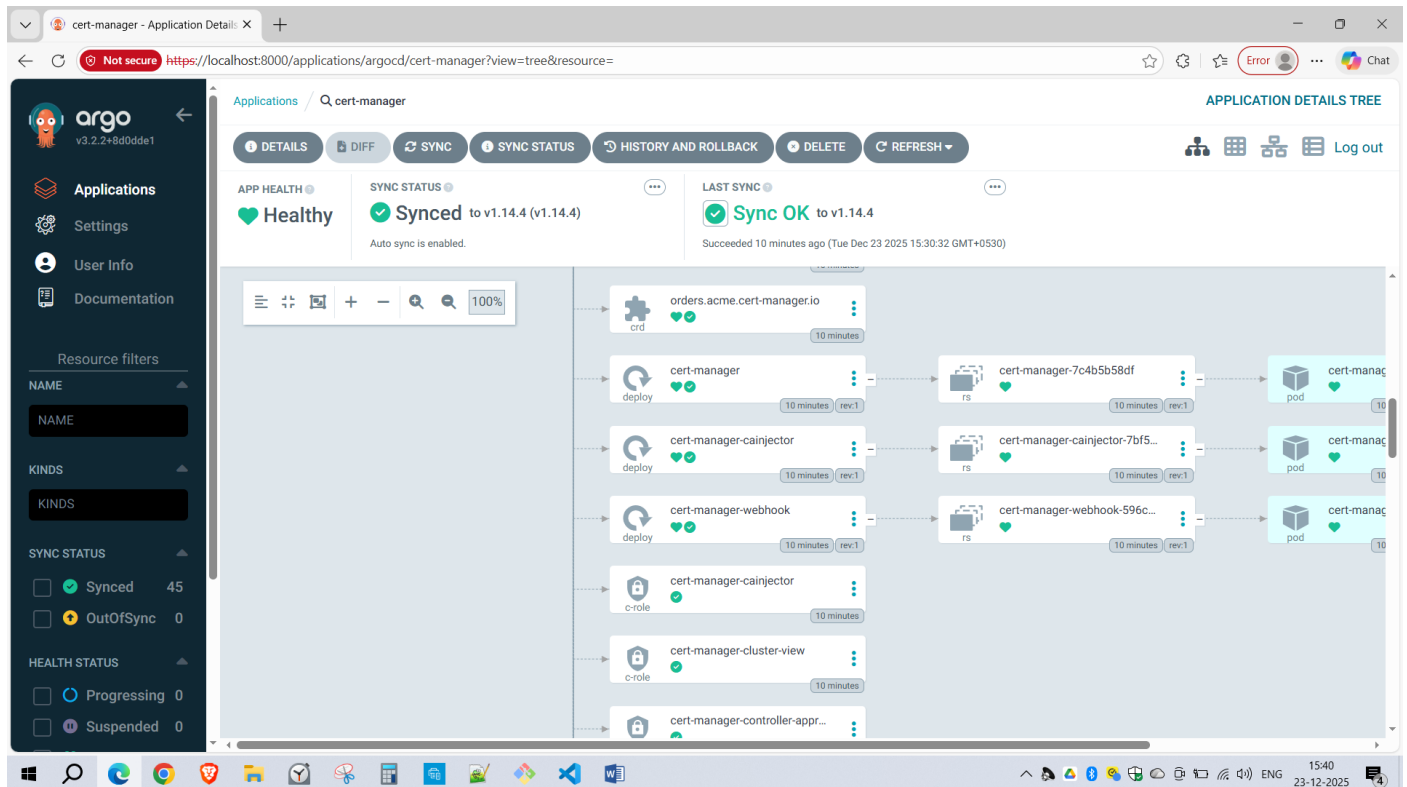

Scaled Kubernetes deployments by deploying three applications via the App-of-Apps pattern in ArgoCD

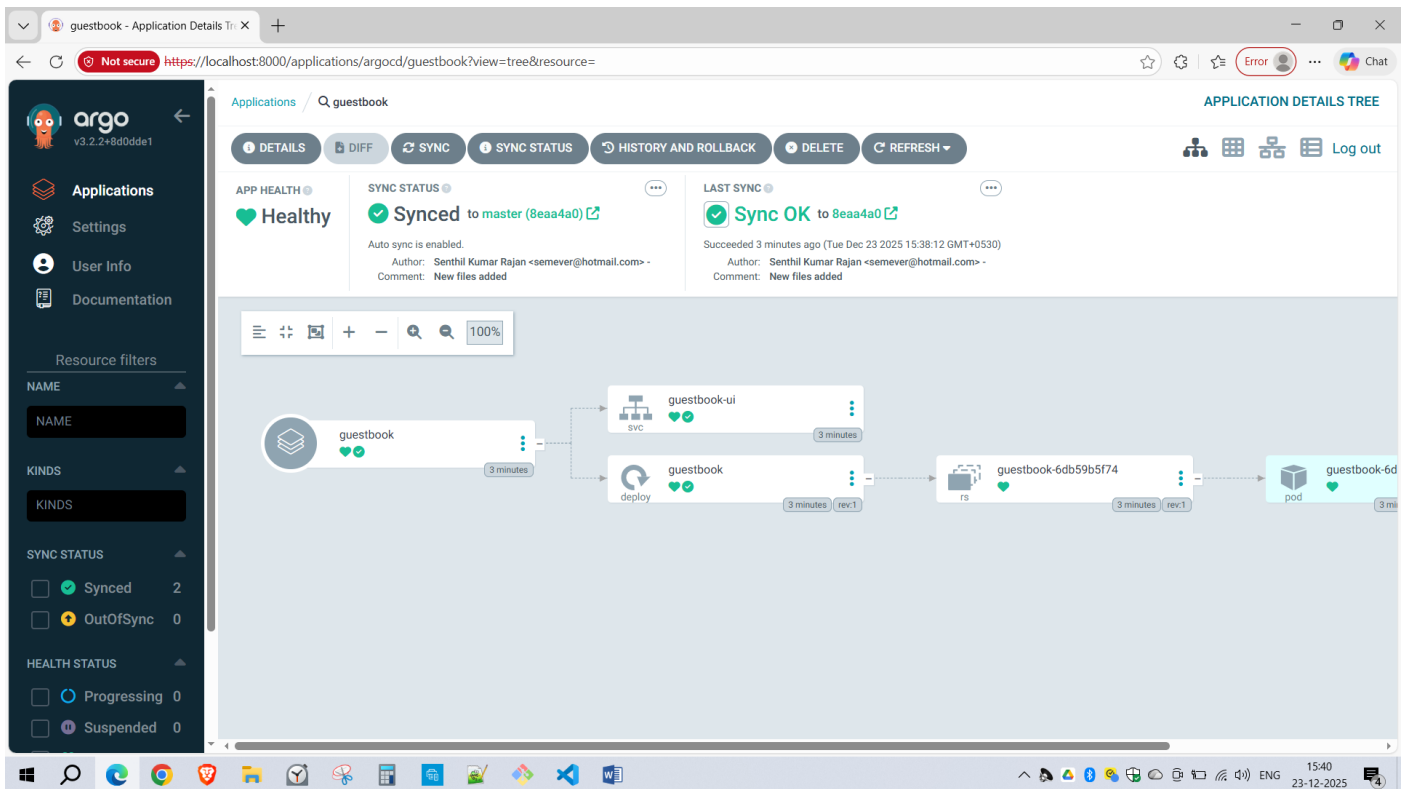

High level App-of-Apps deployment flow showcasing parent and child applications live health status

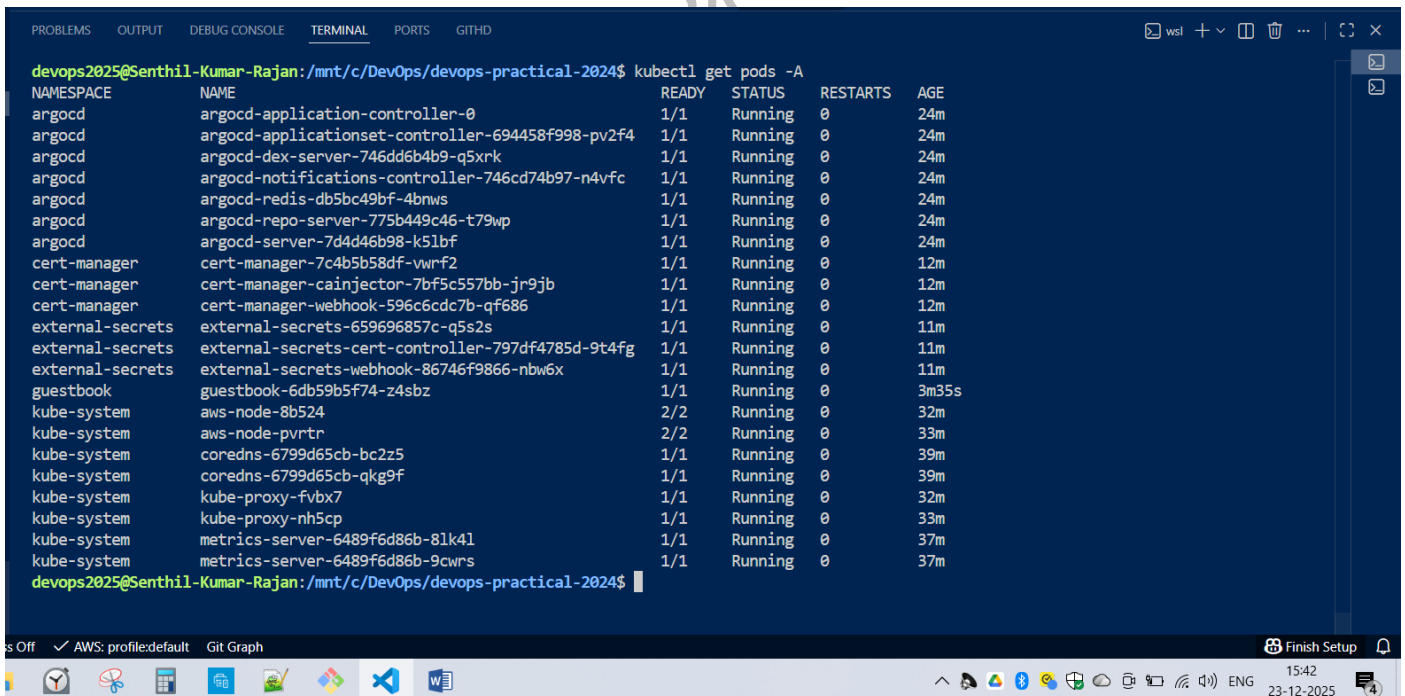

Visualization of three child applications showing deployment flow and live health status

Real-time pod status of applications managed through GitOps

Real-time service status of applications managed through GitOps

```
devops2025@Senthil-Kumar-Rajan:/mnt/c/DevOps/devops-practical-2024$ kubectl get svc -A
```
